BUSINESS AND COMMERCIAL SECURITY

Regardless of whether you're working in a small business or a large corporation, your place of work should be a safe and secure environment for all employees at all times. As a trusted security firm, SM Security Services Pty Ltd has tailored high-quality security solutions for Sydney businesses and commercial establishments for over 30 years. From hospitals to pharmaceutical companies, to financial institutions and court houses including the Supreme Court of Sydney. From the smallest shopfront to the largest warehouse, we can take the confusion out of choosing the right security solution to suit your needs.

IMPORTANCE OF RISK MANAGEMENT

Risk management is an important and integral process in running a successful business. Risk management simply means managing identified risks or threats that exist within your organisation and reducing risk levels to an acceptable level. A well-designed security system, access control and video surveillance system incorporated into your workplace, can in many cases reduce security risks to an acceptable level.

RISK MANAGEMENT BENEFITS

- Increase safety and wellbeing of staff
- Reduce the risk of prosecution of stakeholders
- Reduce likelihood of litigation
- Increase staff morale (feel safer, feel protected)
- Reduce insurance premiums
- Moral and ethical responsibilities from management
- Compliment current WHS (OH&S) obligations

VIDEO SURVEILLANCE

SM Security Services Pty Ltd can design a video surveillance system to suit your needs. CCTV cameras and recording systems are constantly evolving. We pride ourselves on keeping up to date with the latest equipment and technology available.

ACCESS CONTROL

The best and most cost-effective way to lock down your work premises and keep employees safe and secure can be achieved by installing an access control system. A well-designed access control system will save valuable time by allowing staff to safely and quickly move between various departments whilst keeping unauthorised personnel out.

PATROL RESPONSE

Your alarm is activated at 3.00 am, it's cold and it's raining. Sending a patrolman to investigate the alarm can be a much better option and a whole lot safer than attending to investigate yourself. If staff members forget to arm the alarm system at close of business, again sending a patrolman to check and then arm your alarm can be a safe alternative.

24 HOUR SECURITY MONITORING

Not all monitoring companies are equal. With 30 years' experience, we know this only too well. Specialising in the latest IP, GPRS and dual-path alarm monitoring for residential, commercial, business and government. No phone lines needed.
